EDUCATION

B.Comp. Computer Science (Co-op), University of Guelph   **Sep 2017 - August 2023**

Specialization in Mathematics   *Ontario, Canada*

EXPERIENCE

Front End Web Developer (Co-op)   **September 2019 - August 2021**
(Total 16 months)

University of Guelph

- Led a self-managed project to revamp the University campus map using the Google Maps JavaScript API, resulting in an improved user experience.
- Assisted with regular web maintenance and bug fixing, ensuring smooth and error-free operation of the University's web properties.
- Developed and implemented several responsive Web Components (using JavaScript), streamlining the development process across several university departments.

Freelance Web Developer/Designer   **April 2022 - May 2022**

Adorable Aliens NFT

- Designed and developed a custom website for an NFT project using React, Styled Components and Gatsby.
- Created a responsive design that worked well on both desktop and mobile devices.
- Used version control tools such as Git to manage the codebase and collaborate with other developers.

Freelance Web Developer/Designer   **January 2023 - February 2023**

Inspectech Services

- Designed and implemented a website for a home inspection company.
- Utilized SvelteKit and TailwindCSS to build the website's front-end design, ensuring a visually appealing and functional experience for users.
- Implemented a simple email booking form using EmailJS, allowing users to book appointments with the company through the website.
